Semester: B. Spring (Ym 18-19)
Semester Code: D.3.
Registrar: Lia Atrig
lia@heschel.org.il

Course Information:

Course Title: Key Existence
Course Code: 0910.4060.01

Course Instructor: Dr. Ley Attinger

Course Description:
The course's goal is to acquaint students with the various measures and approaches of the environmental social and economic crisis, as well as various methodologies and questions and the dilemmas raised from them. It is intended to allow students to create a personal "existence key" and form a well-informed opinion about the question of what kind of life is possible in the 21st century.

Course Topic:
In recent decades, the impact of humans on ecological systems has grown, as well as the realization that this has social, economic, cultural, health, and security implications. Fast changes expose all areas of life and demand from decision-makers an understanding of the complex interconnections in the global system and adapting local systems to large-scale decisions.

Existence perception creates a conceptual framework allowing to analyze the changes and their implications on the way to find solutions and ways to deal with the challenges, the threats, and the opportunities that the new situation presents.
The course will examine various perceptions and approaches to existence, as well as the tools and methods resulting from them. We will discuss the central controversies and many ethical issues that arise. Among the approaches we will study: national limits for the planet (doughnut economics), Gaia theory, ecological footprint – live off one planet (one planet living), FSSD – framework for strategic thinking of sustainable development, community commons (commoning), etc.

Course Assessment:

Course Work: 40%
- Attendance: 20%
- Group task: 20%
- Individual task: 20%
- Final Exam: 40%

Course Schedule:

On date A: 26.6.18 12:00—26.6.18 12:30.
On date B: 25.7.18 12:00—25.8.18 12:30.

Schedule:
