The course deals with various aspects of gender economic inequality between women and men from a comparative and critical perspective. It is based on feminist, economic, and sociological theories, and examines comparative and local studies. It analyzes various aspects of gender inequality such as: gender division of labor in the family and labor market, glass ceiling, women’s employment and equality in employment and careers, and women’s responsibilities and dilemmas.

On the expression of gender inequality in modern society, and in Israel today, as well as on its expression in traditional societies and in the third world.
